

Training Class -- Introduction to Replang Programming

If you have custom reporting needs that go beyond the capabilities of Report Writer Pro, then you need to learn to program in Replang, Advent's Report Writing Programming Language. All Axys reports, including all standard and custom reports, are written in Replang. CSSI offers three levels of Replang Training Classes:

Introduction to Replang Programming
Intermediate Replang Programming
Advanced Replang Programming

For your convenience, each session will be offered at the same time and location as the various Advent User Group regional meetings. Classes are currently planned for Boston, Chicago, San Francisco, and New York City. Plans are in progress for classes in the Southeast (Atlanta) region, and the South Central (Houston) region. Classes will be offered as long as there is sufficient demand.

Training classes will run from 9am to 4pm and will include lecture instruction as well as hands-on programming exercises. Minimum class size is 3, maximum class size is 10. The cost is \$960 per session for Advent User Group Members, \$1200 per session for non-AUG members. (See www.adventuser.org for information on joining the Advent User Group.)

What will be covered in the Intro to Replang Class?

- *Getting Started (some hints and tips about editing, spaces, comment lines etc)
- *Report Settings and what they mean (oneside, lump, etc)
- *Columns, column headings, column alignment -- techniques for formatting, common issues
- *Language structure and syntax (subroutines, if statements, loops, etc)
- *Printing techniques
- *Debugging techniques
- *Writing to files

Things to do before you attend:

1. You should contact Advent and ask them to send you the Report Writing Language Programmer's Guide (REPU34 or REPU351). There is no charge for the book, but you have to ask for it.
2. Plan on bringing a laptop with both Axys and Report Writer Pro installed. There will be hands-on programming exercises during the class. Computers will not be provided, so make sure you bring your laptop so you can take advantage of the learning opportunity provided by the programming exercises.

Make sure you can start Axys and run various Axys reports on your laptop.

Questions? Contact Mike Herrera, mherrera@cssi.org, 610-992-9287

Please complete the information below and fax the registration form to 610-992-9289.

The cost of the class is \$960 per session for Advent User Group members, \$1200 per session for non-Advent User Group members.

AUG Member \$960 Per Session Non-AUG Member \$1200 Per Session
